A BOOMING CONSTRUCTION MARKET

According to a report by Mordor Intelligence, Saudi Arabia is undergoing a major economic transformation in line with its overarching Vision 2030 strategy, which also involves creating a better quality of life for residents, attracting more tourists, and developing a more diverse and future-focused economy. As a result, the construction market is experiencing unprecedented growth created by the explosion in population and the massive surge in the property market.

MARKET SUMMARY

MAJOR PROJECTS

- In September 2022, the Ministry of Finance signed financing agreements worth SAR 25 billion with several local banks to implement some infrastructure projects scheduled to start in 2023 and 2024.
- The National Center for Debt Management arranged the signing of these agreements, in line with the direction of the Ministry of Finance, to enable and support strategic infrastructure projects in the context of achieving the Kingdom's Vision 2030 goals.
- Another head-turning project is the USD 20 billion Diriyah Gate, which will give Riyadh 20,000 homes when it is completed in 2027, creating a city-sized historic district.
- An international airport worth USD 137 billion will also soon open. Nearly 74% of the USD 200 billion national infrastructure investment goes toward the new airport.
- Jeddah Central Development Company has launched the master plan and main features of the Jeddah Central Project. The project will develop 5.7 million square meters of land overlooking the Red Sea. It is to be financed by the Public Investment Fund and local and international investors.
- The project will include four notable landmarks and contribute to opening the way for the local private sector to participate in the development, which will help shape the operation of promising economic sectors, including tourism, entertainment, culture, and sports.
- In addition, the city will benefit from the building and development of modern residential areas encompassing 17,000 residential units and diversified hotel projects that offer more than 2,700 hotel rooms and the provision of integrated solutions for the business sector.

MAJOR PROJECTS

Increasing Residential Building Supply

- April 2022: Saudi Arabia's National Housing Co. launched 5,000 new residential villas in Riyadh through the Sakani program.
- Saudi Arabia has launched new projects to build nearly 150,000 houses in various areas.
- The new units comprise houses, villas, and apartments in seven key cities.

Demand for Office Space

- Focus on redeveloping Riyadh into a commercial and economic center for the country.
- Great demand for offices in prime locations.
- Plans to introduce 6.1 million square meters of new office space by 2030 and 2.8 million squaremeters in Riyadh's capital.

Prefabricated Building Construction

- Shortage of affordable housing due to the growing population and an influx of expatriates.
- Energy efficiency, design flexibility, and faster completion are some advantages of prefabricated buildings.
- Rapid urbanization and upcoming infrastructural projects will further provide a thrust.

3D Printing

- Saudi Arabia's Vision 2030 reform plan wants to increase home ownership.
- The Building Technology Stimulus Initiative is helping the innovations of the country's housing sector.
- Dar Al Arkan introduced 3D Construction Printing (3DCP) technology.

NEEDS OF THE INDUSTRY

- Investments in various social and urban development projects, such as the Sakani housing initiative.
- Modern prefabrication in the industry is one of the most important future construction trends.
- Infrastructure and construction development will continue to rise in line with Vision 2030.
- Hospitality sector growth to create demand for construction.
- By 2030, Saudi Arabia intends to invest over USD 1 trillion in the country's non-hydrocarbon sector Neom, the Red Sea Project, Qiddiya Entertainment City, King Abdullah Financial District, and Amaala are just a few of the major projects.
- Saudi Arabia's Ministry of Rural Affairs and Housing offered financing and housing solutions to increase the homeownership rate to 70 by 2030.
- Work-from-home and social distancing norms focus on smart homes, larger unit sizes, and well-supported staff and labor accommodation projects for residential real estate.
- Smart homes or home automation is now becoming a status symbol for urban locals, which leads to the demand for strategic investments in the segment.
